Relevant Experience

PMS / SCA / Manufacturing / Migration and Modernization (11.2024 - Present): Technical Lead

Key Responsibilities:

Modernisation of SCA's business-critical Paper Management System (PMS) from a 20-year-old VB6 forms-based application to a future-proofed .NET Blazor-based application as part of the Application Modernisation Programme with Version 1.

Technical Lead: Role Description

Led end-to-end design, development, and delivery of enterprise-level applications, ensuring adherence to technical standards, scalability, and performance goals.

Collaborated with cross-functional teams (Product, QA, DevOps, and Business) to define technical requirements and translate business needs into robust technical solutions.

Guided a team of developers through code reviews, mentoring, and best practice enforcement to maintain high-quality deliverables.

Managed sprint planning, task allocation, and progress tracking using Agile methodologies.

Identified potential risks, bottlenecks, and dependencies early in the project lifecycle and implemented mitigation strategies.

Championed process improvements, including CI/CD pipeline setup, automated testing, and code quality checks.

Acted as the key technical point of contact for stakeholders, ensuring clear communication and alignment on deliverables and timelines.

Project Skills: Net Core 8.0, Blazor, Microsoft SQL Server. Azure, Jira, Azure DevOps, GitHub AI Tools - GitHub Copilot, Claude.ai, Cursor

ChildFirst / CAFCASS / Government Other / .NET Core (08.2023 - Present): Full Stack .NET Developer

Key Responsibilities:

ChildFirst is the main line of business application used by Cafcass. It is the case management system used to manage Cafcass' work with children and young people. ChildFirst is a Platform as a Service (PaaS) cloud solution using an Angular front-end as the user interface (UI). Through the Angular UI access to functions (Searching for information, Adding information, Editing information, Deleting information, Viewing information and Accessing Reporting). Data is entered into ChildFirst and stored in SQL; Documents are saved in SharePoint Online; Reporting is viewed in Power BI.

Full Stack .NET Developer : Role Description

Working as a full stack engineer to develop new feature and fixing the defects in the application using Angular, C#/.NET Core, AZURE function, Micro Service APIs etc. Understanding customer expectations, requirements, formulating solutions,

Lead technical deliveries, assisted on requirement gathering, high-level specification creations, proof of concepts, business/system architecture reengineering, prototyping, and continuous service improvement. Involving in driving daily status call , refinement etc.

TPS - Tyche Pricing System / AON / Insurance / .NET (11.2022 - 08.2023)

Key Responsibilities:

Worked as a full stack engineer to develop new feature and fixing the defects in the application using Angular, C#/.NET Core, AZURE function, Micro Service APIs etc.

Managed a multidisciplinary team of frontend, backend and QA engineers and delivered innovative scalable and secure solutions in line with good industry software engineering practices (code quality, CI/CD, security) using project management/agile delivery methodologies.

Lead technical deliveries, assisted on requirement gathering, high-level specification creations, proof of concepts, business/system architecture reengineering, prototyping, and continuous service improvement.

Liquidity Coverage Ratio (LCR) / Charles Schwab / Capital Markets / .NET (11.2020 - 08.2022)

Key Responsibilities:

Managed a multidisciplinary team of frontend, backend and QA engineers and delivered innovative scalable and secure solutions in line with good industry software engineering practices (code quality, CI/CD, security) using project management/agile delivery methodologies.

Attended continuous customer requests as part of the service management for project works by estimating, analysing and design solutions for gathering requirements to produce technical (e.g. architecture, configuration, release, support-handover) documentation that defined project works and deliveries of them within deadlines.

Interacted weekly/monthly/ quarterly directly with customers to discuss the status of the ongoing activities, drive decision and resolve conflicts, develop further service provision, and evaluate customer's satisfaction throughout the project's delivery.

Work Experience

Version1 / Lead .Net Developer (08.2022 - Present)

Key Responsibilities:

Working as a full stack engineer to develop new feature and fixing the defects in the application using Angular, C#/.NET Core, AZURE function, Micro Service APIs etc. Understanding customer expectations, requirements, formulating solutions, Lead technical deliveries, assisted on requirement gathering, high-level specification creations, proof of concepts, business/system architecture reengineering, prototyping, and continuous service improvement. Involving in driving daily status call , refinement etc.

Milestone Inc. / Technical Lead (08.2021 - 11.2022)**Key Responsibilities:**

Developed and implemented applications, engaging with clients, project managers. Interacted weekly/monthly/ quarterly directly with customers to discuss the status of the ongoing activities, drive decision and resolve conflicts, develop further service provision, and evaluate customer's satisfaction throughout the project's delivery.

Mphasis / Delivery Module Lead (11.2020 - 08.2022)**Key Responsibilities:**

Managed a multidisciplinary team of frontend, backend and QA engineers and delivered innovative scalable and secure solutions in line with good industry software engineering practices (code quality, CI/CD, security) using project management/agile delivery methodologies.

Attended continuous customer requests as part of the service management for project works by estimating, analysing and design solutions for gathering requirements to produce technical (e.g. architecture, configuration, release, support-handover) documentation that defined project works and deliveries of them within deadlines.

Interacted weekly/monthly/ quarterly directly with customers to discuss the status of the ongoing activities, drive decision and resolve conflicts, develop further service provision, and evaluate customer's satisfaction throughout the project's delivery.

Customer Analytics India Pvt. Ltd. / Senior .Net Developer (11.2016 - 11.2020)**Key Responsibilities:**

Worked as part of a team as a full stack engineer developing software using Angular 2+, Azure, C#, ASP.Net 4.0, ADO.Net, MS-SQL Server 2012, Teradata, WCF, WEB API, .NET Core, Micro Service using continuous release.

Contributed to deliver project features as part of an agile development team to the live production delivery.

Quadrant4 Software Solutions / Software Engineer (07.2015 - 11.2016)**Key Responsibilities:**

Worked as part of a team developing software using Visual Studio 2013, C#, MVC Razor, EF, Web API, MySQL, LINQ, HTML-5, Bootstrap, and jQuery.

Participation in design and planning sessions, contributing to the ongoing discussions around general process improvement across the software development practice using Agile methodologies.

Emerio NTT / Software Engineer (02.2014 - 07.2015)**Key Responsibilities:**

Developed and implemented applications using C#, MVC Razor, EF, Web API, MySQL, LINQ, HTML-5, Bootstrap, and jQuery, engaging with clients, project managers, business analysts, application developers, solution architects and data architects to support, implement changes in clients' application and to develop continuous service improvement using cloud service solutions.

KEMPI Technologies Pvt. Ltd / Software Engineer (03.2012 - 02.2014)**Key Responsibilities:**

Worked as part of a team developing software using Visual Studio 2013, C#, MVC Razor, EF, Web API, MySQL, LINQ, HTML-5, Bootstrap, and jQuery.

Participation in design and planning sessions, contributing to the ongoing discussions around general process improvement across the software development practice using Agile methodologies.
